The Berlin Energy Transition Dialogue 2021
There are new global challenges ahead of us, including a rapidly changing climate, rising energy demand and an ongoing public health crisis and its socio-economic ramifications. Although worldwide efforts to reach climate neutrality by 2050 have increased, this process still needs to be accelerated.

The 2021 Berlin Energy Transition Dialogue will focus on the path towards climate neutrality. We believe that in overcoming the economic consequences of the COVID-19 crisis lies an opportunity for a change towards a greener and more circular future.

In the past years the Berlin Energy Transition Dialogue has become the leading international forum for high-level policymakers, industry, science and civil society on ideas about a safe, affordable and environmentally responsible global energy transition. Join us virtually in Berlin, the capital of the Energiewende! Get to know the latest energy trends, debate global policies and future business ideas and #JointheDialogue!
